## ABOUT ME

*I am a Full Stack Web Developer committed to continuous learning and growth. I am currently seeking opportunities to apply my skills and expertise within a collaborative work environment. Eager to contribute to a team where I can not only showcase my knowledge but also acquire new skills through meaningful work experiences.*

## EXPERIENCE

### **Pure-Wheel(2023) - Freelance Project**

- e-commerce platform for a car dealership, featuring favorites, token authentication, and WhatsApp communication. With a robust database connection for intricate car variables, the app supports mobile with responsive design.
- In the team I lead server-side development, APIs, and database management, implementing an MVC pattern. I also managed client-side logic, efficiently consuming APIs for seamless data presentation.

Tech stack: Node.js - Express.js - React - MySql - Sequelize - APIs Rest - JWT

[Server side](#) | [Client side](#)

### **Gains-Gear(2023 - Present) - Freelance Project**

- app dedicated to the sale of gym equipment. Leveraging extensive expertise in React, I've seamlessly integrated advanced functionalities into the application. The app is powered by a user-friendly Firebase database, ensuring efficient data management.
- I have taken charge of every aspect of the development process, ensuring a seamless and impactful progression.

Tech stack: React - Firebase

[Source](#)

### **Digital-Tourism (2022) - Personal project**

- versatile e-commerce platform for selling flights, hotels, and customized travel packages. Users can easily create their packages by selecting flights and hotels. The app includes token authentication for admin control, a robust database connection and responsive design for mobile support
- I handled both the client and server sides, including APIs and the database. Employing an MVC pattern on the server, I also managed client-side logic, proficiently consuming APIs to enhance data presentation on the front end.

Tech stack: Node.js - Express.js - React - MySql - Sequelize - APIs Rest - JWT
